

Have you resurrected plans to re-host workloads off the mainframe?

Baer Consulting (BCI) Managed Cloud Services delivers Platform Hosting and Support for Legacy Application and IBM z Modernization projects.

Z Mainframe Hosting Services:

- Software as a Service
- Compiler Licensing as a Service
- Workload Management as a Service
- Storage Management as a Service
- Mainframe Hosting as a Service
- Disaster Recovery as a Service

Your digital Hosting initiative will still require the maintenance of older, on-premises assets while simultaneously calling for modern application front ends, cloud-native infrastructures, and technologies. BCI Managed Hosting Services will provide staff augmentation, z/OS systems support, managed production, storage management, single vendor ISV software support and disaster recovery. BCI also provides the Mainframe Sunset Services to decommission and remove all hardware from your site when re-hosting is complete.

This approach is designed to help you better align IT services to business priorities by helping speed the digital transformation process while reducing management risk and the overhead expenses of maintaining your own Enterprise Server on-premise.

Contact Us: Feel free to reach BCI by telephone (303.838.3374x140) or email (rich.garcia@baer-consulting.com) for any questions about BCI Hosting or other services we offer.

Self-service: You will find more information about BCI on Linked In at: <https://lnkd.in/eZSgg4a> or browse our company website at www.Baer-Consulting.com
