

Nexxis FailSAFE Cloud Access

FailSAFE provides unprecedented connectivity to your Cloud services and prevents disruption to the Internet. It connects with multiple Internet Providers simultaneously, offering diverse carrier connectivity to maximize high-speed bandwidth. A fully automated solution, engineered with seamless Auto-Failover, FailSAFE is designed for 100% uptime.

SOLUTION DETAILS

Cloud-first SD-WAN Technology

- Unlike other SD-WAN technology, FailSAFE optimizes traffic directly to the cloud

Diverse Internet Carriers

- Simultaneous and redundant connectivity from diverse carriers delivers 100% uptime

Faster Throughput Speeds

- Aggregated Bandwidth from multiple carriers lets you take advantage of the combined throughput

Intelligent Auto Load-Balancing

- FailSAFE uses latency and other path issues to determine the optimal path for traffic

Auto-prioritize Business Applications like VoIP, Video, and VPN

- Built in Quality of Service (QoS) automatically prioritizes latency sensitive traffic

Seamless "Same-IP" Auto-Failover

- Connects with multiple circuits using cloud SD-WAN and provides a single IP address protecting against downtime and reconnection to IP based services

Premier Cloud Provider for
